

IN THE CLAIMS

1.-5. (Canceled)

6. (Previously amended)

A valve, comprising:
a body having an inlet an outlet and a bonnet covering an access opening;
at least two orifice members mounted in said body for relative movement between
them;
at least one of said orifice members secured to said bonnet to facilitate at least one
of mounting and removal of said orifice in tandem with said bonnet.
one of said orifice members is stationary and supported by said bonnet.
a cage secured to said bonnet to support said stationary orifice member.
said stationary member is secured to said cage against any movement.
said stationary member is secured to said cage through an opening in said cage;
a Woodruff key extends through said opening to secure said stationary member to
said cage.
